

NairaPlate UAT script: for the Owner

Version 1.4, 5 October 2026. Matches Master Specification version 1.4.

Who this is for: you, signed in as the Owner of the Demo Kitchen test business. **How long:** about 90 minutes for Parts 0 to 7b, which run on the live site today. Modules D, E and F take longer and can only be run after the offline, paper-entry and price-history screens are released (see the box below). You can stop after any part and carry on later. **Where:** use the live app in a browser. Test business code: `demo-kitchen`. Everything you do is test data. Reversals are final, so use test entries only.

How to use it: do the steps in order. For each step, "Go to" tells you where to click, "Do" tells you what to do, and "You should see" is the pass condition. Tick **Pass** or **Fail**. If a step fails, write what you saw (the exact words of any message) in the margin next to the step and move on.

Which parts can you run today? Parts 0 to 7b and Part 8 work on the live site now. **Modules D, E, F and G are not runnable yet.** Their screens are in the source branch and not on the live site. Before they are released: (1) the permission fix `20261102_hygiene_after_late_entries.sql` must be applied (Master Specification R1); (2) the paper-entry defects D1 to D4 and D6 must be fixed (Part 9 of the specification); (3) the rehearsal `rehearsal_phase0_prices.sql` must be run and clean. Tests marked **Known defect** in Module E are expected to fail until their defect is fixed; they are there so the fix can be proved.

Menu names below are the ones on the app's home screen. The home screen groups them as **Sell, Buy & Stock, Kitchen** and **Oversight**. The "Home" link at the top of every screen takes you back.

Part 0. Before you start (5 minutes)

#	Go to	Do	You should see	Pass	Fail
0.1	Supabase, then SQL Editor	Paste the whole of <code>system_health_check.sql</code> and press Run	One row. The first eight columns read <code>0, 0, 0, 0, 0, 0, true, 8</code> . Known issue until the permission fix is applied: the second, third and fourth values read <code>21, 9, 2</code> (Master Specification R1). That is the known issue, not a new fault; any other number is a Fail	☐	☐
0.2	Supabase, then SQL Editor	Paste the whole of <code>rehearsal_demo_kitchen.sql</code> and press Run	A red error that starts "REHEARSAL DONE. NOTHING WAS SAVED. ALL CLEAR" with <code>findings=0, test_errors=0</code> (200 steps passed on 3 October; the number may be higher after later additions). The red colour is normal: the error is the report	☐	☐
0.3	Cloudflare, then Workers and Pages, then nairaplate, then Deployments	Look at the newest deployment	It is green (succeeded) and came from the <code>main</code> branch	☐	☐
0.4	Supabase, then Database, then Backups	Look at the page	Backups, or Point in Time Recovery, are switched on	☐	☐

| 0.5 | Supabase, then SQL Editor | Before releasing the offline, price-history and paper-entry screens only: paste the whole of `rehearsal_phase0_prices.sql` and press Run | A red error that starts "REHEARSAL DONE. NOTHING WAS SAVED. ALL CLEAR" with `findings=0, test_errors=0` | ☐ | ☐ |

Part 1. Create the account for your first-time tester (3 minutes)

Do this once. It gives her a name and a PIN. This app has no emails or passwords: staff sign in with the **business code** and their own **PIN of 4 to 8 digits**.

#	Go to	Do	You should see	Pass	Fail
1.1	Open the app and sign in as yourself	Enter business code demo-kitchen , press Continue , tap your name, enter your PIN	The home screen with Sell, Buy & Stock, Kitchen and Oversight	☐	☐
1.2	Home, then Oversight , then Staff	Look at the Add staff member form	Fields: Name, Role, Starting PIN (4 to 8 digits)	☐	☐
1.3	Same form	Type the name UAT Tester . For Role pick Cashier . Press Generate next to the PIN	A 6-digit PIN appears on screen: "PIN: 123456 — tell UAT Tester this PIN. It won't be shown again." Write it down now	☐	☐
1.4	Same form	Press Add staff member	A confirmation, and "UAT Tester" appears under Current staff as "Cashier · Active"	☐	☐

Write her sign-in details on the first-time-user script: business code **demo-kitchen**, name **UAT Tester**, and the PIN you wrote down. Do not send the PIN by any channel you would not use for a password. When testing is over, come back to **Staff**, find UAT Tester and press **Deactivate**.

Part 2. Selling (Cashier work, done as Owner) (10 minutes)

#	Go to	Do	You should see	Pass	Fail
2.1	Home, then Sell , then Cash drawer	If it says a shift is already open, stop and tell me. Otherwise type an Opening float (#) of 2000 and press Open shift	The page now shows "Shift open since ..." with a ¥2,000 float	☐	☐
2.2	Home, then Sell , then Till	Leave Channel as Walk-in and Price tier as Standard. Under Item choose a dish, set Quantity 1, press Add (or Add item)	The dish appears in the order with its price	☐	☐
2.3	Same screen	Under Payment pick Cash , then press the Charge ¥... button	A confirmation that the sale was saved	☐	☐
2.4	Home, then Sell , then Orders	Find the sale you just made	It shows as Paid	☐	☐
2.5	Same order	Press Void / Refund . Choose Void , type a reason such as test sale, customer left (at least 5 letters), press the Void ¥... button	The order now shows as Voided	☐	☐
2.6	Same screen, Adjustments tab	Look at the list	A "Void" line with your reason, who did it and when	☐	☐
2.7	Till	Make a second cash sale. Then in Orders press Void / Refund on it, choose Part refund , type an amount smaller than the total and a reason, press the refund button	The order shows as Part refunded and the Adjustments tab shows a "Part refund" line	☐	☐
2.8	Till	Make a sale with Payment set to Customer credit (owe) . Type a customer name Test Customer and a phone number	A confirmation that it was put on credit	☐	☐
2.9	Home, then Sell , then Customer credit	On the Still owing tab find Test Customer. Press Record payment , enter a smaller amount, choose Cash	The balance goes down by that amount	☐	☐

Part 3. Stock and money going out (15 minutes)

#	Go to	Do	You should see	Pass	Fail
3.1	Home, then Buy & Stock , then Ingredients	Find Garri and write down its stock (about 5.2 kg when this script was written). You will compare later. Units that Garri understands are derica (1.2 kg) and mudu (1.5 kg): the Units button on its row shows them	A list with each ingredient's stock	☐	☐
3.2	Home, then Kitchen , then Wastage	Under Ingredient choose Garri, Quantity 1 , Unit derica, Reason Spoilage, press Log wastage	A message "Logged 1 derica of Garri ... Stock has been reduced."	☐	☐
3.3	Ingredients , then Stock trail on that ingredient	Look at the newest line	A line for the wastage, reducing stock by 1.2 (one derica)	☐	☐
3.4	Home, then Buy & Stock , then Purchases	Fill in Ingredient Garri, Quantity 2 , Unit derica, Total paid (₦) 1700 , Grade B and Season Normal (both required), Payment Cash. Press Submit purchase	The purchase appears under Recent purchases . Garri stock goes up by 2.4 kg (two dericas)	☐	☐
3.5	Same list	On that purchase press Reverse . Type a reason of 5 or more characters, press Reverse this purchase	The purchase is marked as reversed and the stock goes back down	☐	☐
3.6	Ingredients , then Edit on one ingredient	Change Price per kg (₦) to a slightly higher number, choose Grade this price is for B and Season it was bought in Normal, press Save	The new price shows on the list, and the History button for that ingredient shows the change	☐	☐
3.7	Home, then Buy & Stock , then Stock take	Under Count stock type a Counted figure that differs from the system figure for one ingredient. In "Why is it different? (required)" type a reason. Press Save count and correct stock	The count is saved and the stock is corrected. It appears under Recent counts	☐	☐

Part 4. The cash drawer (5 minutes)

#	Go to	Do	You should see	Pass	Fail
4.1	Home, then Sell , then Cash drawer	Under Cash counted in drawer (₦) type a figure close to float plus the cash sales you made (voided sales do not count) and press Close shift	"Shift closed", with the expected cash and how it was worked out (float, cash sales, and so on). A difference shows a note	☐	☐
4.2	Same page, Closed shifts	Find the shift you just closed and press Correct the count . Type a new count and a reason of 5 or more characters, press Save adjustment	The original count stays on screen, with your adjustment beside it	☐	☐
4.3	Home, then Oversight , then Alerts	Look at the list	If the count was different from expected, an alert about the difference is there	☐	☐

Part 5. Batches and the three Reverse buttons (20 minutes)

Use test entries only. Every reversal is final.

#	Go to	Do	You should see	Pass	Fail
5.1	Home, then Kitchen , then Log a batch	Under Dish cooked choose a dish. If it says "This dish is set to Made to order", choose a different dish. Leave How many times the recipe at 1 , type Plates actually made 10 , press Save batch	A "Saved:" summary with cost per plate	☐	☐
5.2	Ingredients , then Stock trail on an ingredient used by that dish	Look at the newest line	"Used in a batch", reducing stock	☐	☐
5.3	Log a batch , then scroll to Recent batches	Find the batch you just made. Press Reverse . Read the note. Type a reason of 5 or more characters. Press Reverse this batch	The batch is marked "Reversed" with your reason. A green message says the ingredients are back in stock	☐	☐
5.4	Ingredients , then Stock trail (same ingredient)	Look at the newest lines	A line "Batch reversed, put back" which cancels the earlier "Used in a batch" line. Stock is back to what it was before the batch	☐	☐
5.5	Log a batch, Recent batches	Look at the older batches from before 3 October (there are six)	Each has a Reverse button. Pressing it with a reason gives the message "This batch was recorded before reversals existed, so it cannot be reversed." That message is correct and expected	☐	☐
5.6	Home, then Oversight , then Channel payouts	Pick Channel Walk-in, keep the dates, type Commission they took (฿) 0 and Amount that reached your bank (฿) equal to the sales shown above, press Save payout	"Payout saved." It appears under Past payouts	☐	☐
5.7	Same page, Past payouts	On that payout press Reverse . Type fewer than 5 characters first: the Reverse this payout button stays greyed out. Then type a proper reason and press the button	The payout is faded, struck through and marked Reversed , with "Reversed by [your name] ... It no longer counts." A green message says to record the correct payout	☐	☐
5.8	Same page	Look at the reversed payout	There is no Reverse button on it any more	☐	☐
5.9	Home, then Buy & Stock , then Ingredients , then Edit on an ingredient used by a dish	Raise the price noticeably (for example by a third) and press Save	The new price is saved	☐	☐
5.10	Home, then Oversight , then Pricing review (this opens the Recipes page, scroll to Pricing review)	Find the dish whose price is now more than 2% away from the suggestion	The dish appears with "Now ฿..." and "Suggested ฿..." and three buttons: Publish , Adjust portion , Defer	☐	☐
5.11	Same section	Press Publish ฿...	A message "price changed ฿... → ฿...". The new price shows	☐	☐

#	Go to	Do	You should see	Pass	Fail
5.12	Same page, Price decision history	Find that decision (newest, "Published new price"). Press Reverse . Read the note: it says the price goes back to the old figure. Type a reason and press Reverse this decision	A message "Decision reversed. The dish price is back to #...". The decision is marked "(Reversed)"	☐	☐
5.13	Recipes , then the dish	Check the selling price	It is the old price again	☐	☐
5.14	Pricing review , history	Find an older "Published new price" decision from earlier days and press Reverse with a reason	Either it works, or you see "Not reversed: the dish price has changed since this decision, so it cannot be put back safely." Both are correct. Write down which you got	☐	☐
5.15	Ingredients , Edit	Put the ingredient price back to what it was in step 3.6 and press Save	Saved	☐	☐

Part 6. The record of what happened (5 minutes)

#	Go to	Do	You should see	Pass	Fail
6.1	Home, then Oversight , then Audit log	Leave the dates on the last 7 days and look at the list	Lines for what you did today: order voided or refunded, cost changed, price published, and others	☐	☐
6.2	Same page	Look for lines about the payout, the price decision and the batch you reversed	Known issue: these three may show as plain code names (payout_reversed , price_decision_reversed , batch_reversed) instead of readable text. The lines should still be there with the reason in the description. Write down what you see	☐	☐

Part 7. Who can see what (10 minutes)

For each row, sign out first (the sign-out icon in the top bar of the home screen), then sign in again with **demo-kitchen** and pick the person from **Who's working?**. Use the existing Demo Kitchen staff, or the UAT Tester account.

#	Sign in as	Do	You should see	Pass	Fail
7.1	A Cook (Kitchen Staff)	Look at the home screen	Only the Kitchen group (Recipes, Log a batch, Wastage, Stock take). No Till, no Purchases	☐	☐
7.2	The same Cook	Open Log a batch , then scroll to Recent batches	The list shows, but there is no Reverse button	☐	☐
7.3	A Cashier (or UAT Tester)	Look at the home screen	Only the Sell group (Till, Cash drawer, Orders, Customer credit)	☐	☐
7.4	The same Cashier	Open Orders and look at an order made by someone else	Pressing Void / Refund and trying gives "Only an owner can adjust another cashier's order"	☐	☐
7.5	A Purchaser	Look at the home screen	Only Buy & Stock. In Purchases , recent purchases have no Reverse button	☐	☐

Part 7b. Cash taken out of the drawer (15 minutes)

Do this with a shift open. If you closed it earlier, open a new one first (Home, then **Sell**, then **Cash drawer**, float **2000**, **Open shift**). The cashier steps (7b.1 to 7b.4) can be done signed in as the cashier or UAT Tester;

the owner steps need you signed in as the Owner.

#	Sign in as	Go to	Do	You should see	Pass	Fail
7b.1	Cashier who opened the shift	Home, then Sell , then Cash drawer	Scroll to Cash taken out . Type Amount (#) 4000 , What for Market run, Note tomatoes and pepper . Press Take cash out	"¥4,000.00 recorded as taken out of the drawer." It appears in the list as Recorded	☐	☐
7b.2	Same cashier	Same section	Take out another 4000 (Gas or fuel , note gas refill for the stove)	Recorded. The text above the form now says you can take out about ¥2,000 more	☐	☐
7b.3	Same cashier	Same section	Try 4000 again (Transport , note bike to the market). The button now says Ask the owner . Press it	A message that it is over your limit and is waiting for the owner. The list shows it as "Waiting for the owner"	☐	☐
7b.4	Same cashier	Same page	Look at the Close shift button	It is greyed out, with a red message: a cash payout is waiting for the owner	☐	☐
7b.5	Owner	Cash drawer	Find Waiting for your approval . Press Decline , type no : the Decline this request button stays greyed out. Then press Approve instead	The request becomes "Approved" and now counts as paid out	☐	☐
7b.6	Cashier	Cash drawer	Ask for another large amount, for example 9000 (Other, note large item for the stove)	It waits for the owner	☐	☐
7b.7	Owner	Cash drawer	Press Decline , type a reason such as not needed on the shift , press Decline this request	The request shows "Declined" with your reason and does not count	☐	☐
7b.8	Owner	Cash drawer	Take out 20000 yourself (Supplier settlement , note settled the flour account)	Recorded straight away with no approval step, because owners have no limit	☐	☐
7b.9	Owner	Same list	On that ¥20,000 payout press Reverse , type a reason, press Reverse this payout	It is struck through and marked Reversed. No Reverse button remains on it	☐	☐
7b.9a	Owner	Same list	Find a payout that was Approved (from step 7b.5), not Recorded	It has no Reverse button. This is how the screen was built (Master Specification S2). Tick Pass if there is no button	☐	☐
7b.10	Owner	Cash drawer, Cashier limit box	Type 12000 and press Save limit	"The limit was changed." The label now says ¥12,000.00. Put it back to 10000 afterwards	☐	☐

#	Sign in as	Go to	Do	You should see	Pass	Fail
7b.11	Purchaser	Home, then Buy & Stock , then Purchases	Log a purchase: Payment Cash . Tick Paid from the cash drawer . Submit	Saved. On the Cash drawer screen (as owner) a new payout "Purchase of ..., paid from the drawer" appears	☐	☐
7b.12	Owner	Purchases, Recent purchases	Reverse that purchase with a reason	The purchase is reversed AND the payout on the Cash drawer screen shows as Reversed with the same reason	☐	☐
7b.13	Purchaser	Home, then Buy & Stock , then Suppliers, Pay a supplier	Pick a supplier, amount 500 . Open How was it paid? and choose Cash from the drawer . Press Record payment	Saved. A payout "Payment to ..., paid from the drawer" appears on the Cash drawer screen	☐	☐
7b.14	Purchaser	Same screen	Pay a supplier 100 and choose Bank transfer	Saved. No new payout appears. Open the supplier's page: the line says "Bank transfer"	☐	☐
7b.14a	Purchaser	Same screen	Try to press Record payment with How was it paid? left on "Choose how it was paid"	The button stays greyed out	☐	☐
7b.14b	Purchaser	Same screen	Choose Other and leave the note empty (or type abc)	A red message asks for a note of at least 5 characters, and the button stays greyed out. With the note paid by POS card it saves	☐	☐
7b.14c	Purchaser	Same screen, with no shift open	Choose Cash from the drawer and press Record payment	A red message: "There is no open shift, so this cannot be paid from the cash drawer...". Nothing is saved (the supplier balance does not change). Choose Bank transfer instead and it saves	☐	☐
7b.15	Cashier	Cash drawer	Check first: if float plus cash sales is less than what you took out, the expected figure is below zero and cannot be typed as a count. Ring up cash sales on the Till first (Home, then Sell , then Till), or have the owner close the shift with Close this shift as owner . Then count the drawer: float, plus cash sales, minus everything taken out and approved (declined and reversed ones do not count). Type that in Cash counted in drawer (#) and press Close shift	"Shift closed". The summary shows Cash paid out of the drawer and the shift is Balanced	☐	☐

#	Sign in as	Go to	Do	You should see	Pass	Fail
7b.16	Owner	Cash drawer, Closed shifts	Look at the closed shift	The line shows "paid out ₦..." with the figures	☐	☐
7b.17	Cook or Purchaser	The address bar	Type the address of the Cash drawer screen (/drawer) after the web address	The page says "Cashiers and owners only."	☐	☐

Catering deposit method

#	Go to	Do	You should see	Pass	Fail
7b.18	Owner or cashier: Home, then Sell , then Catering	Start a booking. Type a Deposit paid (₦) of 500 . Do not choose how it was paid yet	A new box How was the deposit paid? appears. The booking cannot be saved: the message says to choose cash or transfer	☐	☐
7b.19	Same booking	Choose Cash and book it	Booked. With a shift open, the cash deposit is counted in that shift's expected cash	☐	☐

Catering calendar

#	Go to	Do	You should see	Pass	Fail
7b.20	Owner or cashier: Home, then Sell , then Catering	Find a confirmed order that has a date. Press Add to calendar	Up to four buttons: Share calendar file (any calendar) , Google Calendar , Outlook , and (only if the customer's phone number is readable) Send calendar links to customer on WhatsApp . A line under them says how long the entry lasts and that it holds no prices	☐	☐
7b.21	Same	On a phone, press Share calendar file (any calendar)	The phone's share list opens (choose WhatsApp or Files). On a computer the file downloads instead and a green message says it was saved	☐	☐
7b.22	Same	Open the file you saved or received	Your calendar offers to add "{business}: catering order" on the right date at the event time (Nigeria time), for 2 hours, with the address as the place and an alert one day before. No price or balance is in it	☐	☐
7b.23	Same	Press Google Calendar	A Google Calendar page opens with the title, date, time, place and items filled in. Saving adds it	☐	☐
7b.24	Same	Press Outlook	Outlook on the web opens with the same details. If it fails for a work or school account, write that down: the calendar file is the reliable route	☐	☐
7b.25	Same	Press Send calendar links to customer on WhatsApp	WhatsApp opens a message to the customer with a Google link and an Outlook link, and no prices	☐	☐
7b.26	Same	Look at an order that is an enquiry or cancelled , and at one with no event time	The enquiry and the cancelled order show no Add to calendar . An order with no event time gives an all-day entry	☐	☐

Module D. Offline resilience, safe degraded mode (Phase 0)

Run on a real Android phone. Do UAT-OFF-01 to 07 first, then 08 to 15.

Test data: cashier account, owner account, a normal menu dish, a credit customer (name and phone), and one cash, one transfer and one split sale. UAT-OFF-14 also needs a second test business.

Record for this run: Tester _____ Device _____ Browser and version _____ Android version _____ Start time _____ End time _____

ID	Test	Connection setup	Do	Expect	Actual	Pass	Fail	Blocked	Screenshot / recording ref (for any fail)
UAT-OFF-01	Normal online cash sale	Online	Add two dishes, Cash, press Charge. Check Orders.	One order with a sale code; draft clears only after the save is confirmed.		☐	☐	☐	
UAT-OFF-02	Double-tap Charge	Online	Build a sale, tap Charge twice quickly. Check Orders.	One order only; the second tap returns the original sale.		☐	☐	☐	
UAT-OFF-03	Connection drops before submit	Airplane mode	Build a sale, turn on airplane mode, try Charge. Reconnect, check Orders.	Red offline warning; Charge disabled; draft kept; no sale created.		☐	☐	☐	
UAT-OFF-04	Connection drops during submit	Airplane mode straight after Charge	Press Charge, cut connection at once. Try another sale.	"Checking sale status..."; draft locked; no second sale possible.		☐	☐	☐	
UAT-OFF-05	Server saved, browser timed out	Airplane mode straight after Charge	Reconnect, press Check again.	Original sale found; no duplicate; draft clears only after confirmation.		☐	☐	☐	
UAT-OFF-06	Server did not save	Airplane mode before the request leaves	Reconnect, Check again, then Charge again. Check Orders.	Reported not saved; retry creates exactly one sale.		☐	☐	☐	

ID	Test	Connection setup	Do	Expect	Actual	Pass	Fail	Blocked	Screenshot / recording ref (for any fail)
UAT-OFF-07	Refresh during unsaved draft	None	Build a split sale with several items, refresh.	Items, quantities, payment method and split amounts restore.		☐	☐	☐	
UAT-OFF-08	Credit draft refresh	None	Credit sale with name and phone, refresh. Then discard (and let one expire).	Name and phone restore; removed on discard or expiry.		☐	☐	☐	
UAT-OFF-09	Cash/transfer/split draft refresh	None	Build each, refresh.	No customer details kept on the device.		☐	☐	☐	
UAT-OFF-10	Browser restart during outage	Airplane mode	Build a sale offline, close browser fully, reopen Till.	Recoverable draft offered, clearly not a saved sale.		☐	☐	☐	
UAT-OFF-11	Paper fallback	Airplane mode	Print the paper form.	All fields print; it says it is not a saved NairaPlate sale.		☐	☐	☐	
UAT-OFF-12	Connection returns	Airplane mode off	Go offline, then reconnect; watch the bar and Charge.	Offline → checking → online; Charge back only after a successful server check.		☐	☐	☐	
UAT-OFF-13	Existing sale code reused	Controlled resend	Resend the same sale code for the same business.	Original order returned; no new sale.		☐	☐	☐	

ID	Test	Connection setup	Do	Expect	Actual	Pass	Fail	Blocked	Screenshot / recording ref (for any fail)
UAT-OFF-14	Cross-business client sale code isolation	Second test business	From business B, Check again and submit with Demo Kitchen's code.	B cannot see Demo Kitchen's sale; B's submission becomes only B's order; Demo Kitchen's order unchanged.		☐	☐	☐	
UAT-OFF-15	Expired draft guard	Draft (cash and credit) last edited over 24 hours ago, set by a safe test method	Open the Till; read the card; look for Charge; press Ask owner to review; discard with reason and confirm; check stored drafts and Orders, payments, stock, drawer, Credit	Card says "Expired — not saved" with times, items, payment, unconfirmed total, customer-details flag and "no order, payment, stock movement or cash-drawer entry was created"; cannot be charged; review form prints and draft stays unchanged; discard removes it and any customer name/phone; nothing created in money or stock records		☐	☐	☐	

Release gate. Phase 0 is not released until all 15 tests have a recorded result and all of these hold:

1. No duplicate order is created in double-submit, retry and timeout-recovery paths.
2. No unsaved draft is shown as a saved sale.
3. Cashier instructions are understood during offline and uncertain-submission states.
4. No unnecessary customer data stays in non-credit drafts, or after a draft is discarded or expires.
5. Health check, regression tests and full rehearsal remain clean after the Phase 0 changes.
6. The deployed preview is tested on at least one real Android phone using airplane mode, not only desktop tools or unit tests.

Owner sign-off (Module D): I (name) _____ ran Module D on (date) _____
 _____ . Passed _____ of 15. Failed _____
 _____ . Blocked _____ .

Module E. Paper (late) entries (after release)

Do **not** run this module until the permission fix is applied, D1 to D4 and D6 are fixed, and the screens are released (see the box at the top). Run it as the Owner and as a Cashier (UAT Tester) in two browsers. Rejections and approvals cannot be undone. Use test dishes.

Test data: a dish that has never been edited (for example Jollof Rice), a dish whose menu row is a later version (for example Eba & Egusi), a past shift that is closed and the current open shift.

ID	Sign in as	Go to	Do	You should see	Known defect	Pass	Fail	Blocked
UAT-LATE-01	Cashier	Home, then Sell , then Paper sales	Look at the tabs and buttons	The tab Enter paper sale is open. There is no Approve & post and no Reject button anywhere		☐	☐	☐
UAT-LATE-02	Cashier	Paper sales, Enter paper sale	Type Paper form reference PS-001 , Actual sale time two hours ago, Why it was on paper network down . Pick Jollof Rice quantity 2 , payment Cash. Press Send to owner for approval	The entry is sent. The screen says it is a request that is not yet a saved sale and does not change cash, stock or reports. The price shown for the dish is the price in force at that time		☐	☐	☐
UAT-LATE-03	Owner	Orders, Cash drawer, Ingredients, Stock trail	Look for the paper sale	Nothing: no new order, no change in expected cash, no stock movement		☐	☐	☐
UAT-LATE-04	Cashier	Enter paper sale	Enter a paper sale for Eba & Egusi with a sale time two hours ago	The dish shows its price at that time and the entry is sent	D1. The database was fixed and read live on 5 October (the lookup now accepts the menu row). Not yet proved on the screen. If it still shows "no price then", D1 is not fixed	☐	☐	☐
UAT-LATE-05	Cashier	Enter paper sale	Try a sale time 4 days ago, then a time tomorrow	Both are refused: older than 72 hours, and not in the future		☐	☐	☐

ID	Sign in as	Go to	Do	You should see	Known defect	Pass	Fail	Blocked
UAT-LATE-06	Cashier	Enter paper sale	Fill a valid entry (reference PS-002) and press Send to owner for approval twice quickly	Only one entry exists in the owner's Waiting tab		☐	☐	☐
UAT-LATE-07	Owner	Paper sales, Waiting	Open an entry with Details . Type no as the reject reason: Reject stays greyed out. Type duplicate of a till sale and press Reject	The entry moves to Posted & rejected as rejected, with your reason. Orders, cash and stock are unchanged		☐	☐	☐
UAT-LATE-08	Owner	Paper sales, Waiting	Approve a cash entry whose sale time is inside the currently open shift (press Approve & post)	A sale is posted. Orders shows it with a Late entry label, the paper reference, the real sale time, who entered it and who approved it. Stock is reduced for a made-to-order dish. Expected cash on the open shift includes the cash		☐	☐	☐
UAT-LATE-09	Cashier, then Owner	Enter paper sale, then Waiting	Enter a Transfer entry. As owner, approve it	It posts, and the order is shown as waiting for payment or paid, as decided. It does not fail	D2. Today the approval fails with a database error	☐	☐	☐
UAT-LATE-10	Cashier, then Owner	Same	Enter a Split entry (cash part and transfer part). Approve it	It posts. Only the cash part counts in the shift's expected cash		☐	☐	☐
UAT-LATE-11	Cashier, then Owner	Same	Enter a paper sale whose time falls in an earlier shift that is closed . As owner, open it	It shows needs shift review . Approve & post stays greyed out until you choose one of the two answers about the cash		☐	☐	☐

ID	Sign in as	Go to	Do	You should see	Known defect	Pass	Fail	Blocked
UAT-LATE-12	Owner	Same, then Cash drawer	Choose "Yes, the cash was included in the count at close" and approve. Look at the open shift's expected cash and the closed shift	The sale posts. The open shift's expected cash does not include that cash. The closed shift's figures are unchanged	D3. Today the open shift counts the cash	☐	☐	☐
UAT-LATE-13	Owner	Same, then Cash drawer	Do the same with a second entry and choose "No, record it as late cash against that closed shift"	The closed shift shows one adjustment for that cash amount. The cash is counted once only	D3, D6. Today it counts in the open shift too	☐	☐	☐
UAT-LATE-14	Owner	Orders	On a posted paper sale press the usual refund or void	It works like any other sale. Write down whether a void is allowed: a void is normally only on the day of the sale, and for a paper sale it is not clear which day counts		☐	☐	☐
UAT-LATE-15	Cook or Purchaser	The address bar	Type <code>/late-entries</code> after the web address	No entries and no approve or reject buttons. Nothing can be sent		☐	☐	☐
UAT-LATE-17	Owner	Waiting	Open an entry for a dish with a sale time earlier than 25 September 2026 (before any ingredient price was known)	The card says Food cost unknown at sale time and lists the missing prices. Approve & post is replaced by a box Use today's cost as an estimate and a reason box. With a reason under 5 letters the button stays grey		☐	☐	☐
UAT-LATE-18	Owner	Same, then Orders	Tick the estimate box, type a reason of 5 or more letters and press Approve with estimated cost . Then open Orders	The sale posts. Orders shows the label Food cost: Estimated — today's prices in red. A sale whose prices were all known shows Costed at sale time instead		☐	☐	☐

ID	Sign in as	Go to	Do	You should see	Known defect	Pass	Fail	Blocked
UAT-LATE-19	Owner	Same	Approve (or try to approve) a closed-shift entry and choose "record it as late cash" for a shift that was closed without a count	Refused with "That shift was closed without a count...". Choose the other answer instead	D6 fix (script 20261106). Not proved on the screen	☐	☐	☐
UAT-LATE-16	Owner	Oversight, then Audit trail	Look for the lines for the entries above	"Late entry submitted", "Late entry rejected" and "Late entry posted" lines with the paper reference and amounts		☐	☐	☐

Owner sign-off (Module E): I (name) _____ ran Module E on (date) _____
 _____ . Passed _____ of 19. Failed _____
 _____ . Blocked _____ . Defects D1 to D4 and D6 fixed and re-tested: yes / no.

Module F. Dish price history (after release)

Do not run this module until the price-history screen is released. Owner only, except UAT-PRICE-08.

ID	Go to	Do	You should see	Pass	Fail	Blocked
UAT-PRICE-01	Home, then Kitchen , then Recipes . Press Edit on a saved dish. Scroll to Price history	Read the list	One row marked In use (set by "Starting price") with today's start time, and the explanation that a started price can't be changed	☐	☐	☐
UAT-PRICE-02	Same	Under Set new price (#) type today's price plus 50 . Keep Start now . Press Use this price now	The message "New price is now in use." The old row says Ended , the new row In use	☐	☐	☐
UAT-PRICE-03	Home, then Sell , then Till	Add that dish and press Cash	The Till shows the new price and a cash sale at the new total saves. The earlier sale in Orders keeps the old price	☐	☐	☐
UAT-PRICE-04	Back on the dish's Price history	Choose Start on... , pick tomorrow 09:00, type a price, press Schedule price	"New price scheduled for ...". A row marked Scheduled with a Cancel button. The Till still charges today's price	☐	☐	☐
UAT-PRICE-05	Same	Choose Start on... and pick a time in the past	A red message: "Pick a future date and time."	☐	☐	☐
UAT-PRICE-06	Same	Press Cancel on the scheduled row. Look at the In use and Ended rows	"Scheduled price cancelled." The row is gone. The rows that have started have no Cancel button and no way to edit them	☐	☐	☐

ID	Go to	Do	You should see	Pass	Fail	Blocked
UAT-PRICE-07	Oversight, Pricing review	Publish a price on a dish, then open that dish's Price history	A new row appears, set by "Recipe or pricing change". Reversing the decision (Part 5) adds another	☐	☐	☐
UAT-PRICE-08	Cook, then Cashier	Open Recipes and edit a dish	No Price history panel is shown to a cook or a cashier	☐	☐	☐
UAT-PRICE-09	Owner	Oversight, Audit trail	"Dish price started", "Dish price scheduled" and "Dish price cancelled" lines with the dish, the price and the time (Lagos)	☐	☐	☐

Owner sign-off (Module F): I (name) _____ ran Module F on (date) _____.

_____ . Passed _____ of 9. Failed _____.

_____ . Blocked _____.

Module G. Ingredient price history (after release)

Do not run this module until the ingredient screens are released. Run it as the Owner, except UAT-ING-07. Use one test ingredient (for example Rice) and write down its price before you start.

ID	Sign in as	Go to	Do	You should see	Pass	Fail	Blocked
UAT-ING-01	Owner	Ingredients	Press Price timeline on your test ingredient	A list, newest first. Rows from before today carry the grey tag from earlier records . The line "Before the oldest row, the price is not known" is shown. No Edit or Delete on any row	☐	☐	☐
UAT-ING-02	Owner	Ingredients	Change the price of the ingredient by hand (new price, grade, season) and save. Reopen Price timeline	A new top row Price changed by hand with the new price, grade and today's time. The older row is still there	☐	☐	☐
UAT-ING-03	Purchaser	Purchases	Log a purchase of that ingredient that sets a new price. Reopen Price timeline	A row Purchase with the price worked out from the total and quantity	☐	☐	☐
UAT-ING-04	Owner	Purchases	Reverse that purchase with a reason. Reopen Price timeline	A row Purchase reversed showing the price going back to what it was. The two earlier rows are unchanged	☐	☐	☐
UAT-ING-05	Owner	The owner's profit and loss report	Pick a period that straddles your price change in UAT-ING-02	Older sales without a saved cost use the price in force when they were sold, and later sales the new price. For a period before the first known price, the report falls back to today's prices and shows a warning that those sales are estimates. Write down the exact warning wording	☐	☐	☐

ID	Sign in as	Go to	Do	You should see	Pass	Fail	Blocked
UAT-ING-06	Owner	Ingredients	Try to delete the test ingredient and to change its unit	Both are refused: an ingredient with price history keeps its unit and cannot be deleted	☐	☐	☐
UAT-ING-07	Cook, then Cashier	Ingredients	Look for Price timeline	The button is not shown to a cook or a cashier	☐	☐	☐
UAT-ING-08	Owner	Oversight, Audit trail	Look for the line about the hand price change in UAT-ING-02	"... changed the price of ... from ... to ... kobo per ..." with who and when	☐	☐	☐

Owner sign-off (Module G): I (name) _____ ran Module G on (date) _____
 _____ . Passed _____ of 8. Failed _____
 _____ . Blocked _____ .

Part 8. Final tidy-up

#	Do	Pass	Fail
8.1	If you opened a shift and did not close it, close it now	☐	☐
8.2	When the first-time user has finished, go to Oversight , then Staff , find UAT Tester and press Deactivate	☐	☐

What to send me

For every Fail: the step number, what you did, what you saw, and the exact words of any message. Also send the outputs of steps 0.1 and 0.2 (and 0.5 once it applies). I will check the database side before changing anything.

Sign-off: I (name) _____ ran this script on (date) _____ .
 Steps passed _____ of _____. Steps failed _____ .
