

## NairaPlate for Accountants and Bookkeepers

Clean records from the kitchen. **Faster, more reliable month-end.**

### Records you can **work with**

Your client or their staff download clean CSV exports from NairaPlate at month-end, including:

Sales Day Book

Cash Drawer Summary

Cash Paid-Out Register

Supplier Ledger

Customer Ledger

Refund & Reversal Register

Wastage & Batch Report

**Built for sums and pivots:** amounts appear as plain numbers (e.g. 1450.00) with matching kobo columns, so you can sum and pivot easily.

### The controls **behind the numbers**

#### Cash and staff

- Shift-based cash drawers with opening float and closing counts.
- Automatic detection of cash short/over, with alerts to the owner.
- Cash paid-out recorded for market runs, fuel, transport and supplier payments.
- Owner approval for payouts, refunds and sensitive actions.
- Role-based access and PIN login for staff on shared devices.

#### Purchases, suppliers and credit

- Market and supplier purchases recorded with ingredient-level detail.
- Supplier ledger showing what is owed, payments and advances.
- Customer credit (tabs) for approved customers, with repayment tracking.
- Optional receipt photo capture for purchases and payouts (on request).

#### Food cost and margin

- Recipe costing with plate-level cost and target margin.
- Batch logging with actual portions produced, and wastage logging for spoilage, over-cooking and other losses.
- Plain-language explanations of why margin moved, for example a purchase price increase or higher wastage (Restaurant and Full Suite profiles).

**Result:** Month-end, tax and audit preparation become faster and more reliable.

### Working with NairaPlate

- 1 We set the kitchen profile (Buka, Restaurant or Full Suite) based on the size of the business.
- 2 We configure the menu, recipes and basic settings with the owner.
- 3 Staff use the till; the owner uses the daily summaries.
- 4 At month-end, you or the owner download the CSV reports.

A 2 to 4 week pilot in one outlet is available before rolling out more widely.
