

NairaPlate UAT script: for the Owner

Who this is for: you, signed in as the Owner of the Demo Kitchen test business. **How long:** about 60 minutes. You can stop after any part and carry on later. **Where:** use the live app in a browser. Test business code: `demo-kitchen`. Everything you do is test data. Reversals are final, so use test entries only.

How to use it: do the steps in order. For each step, "Go to" tells you where to click, "Do" tells you what to do, and "You should see" is the pass condition. Tick **Pass** or **Fail**. If a step fails, write what you saw (the exact words of any message) in the margin next to the step and move on.

Menu names below are the ones on the app's home screen. The home screen groups them as **Sell, Buy & Stock, Kitchen** and **Oversight**. The "Home" link at the top of every screen takes you back.

Part 0. Before you start (5 minutes)

#	Go to	Do	You should see	Pass	Fail
0.1	Supabase, then SQL Editor	Paste the whole of <code>system_health_check.sql</code> and press Run	One row. The first eight columns read <code>0, 0, 0, 0, 0, 0, true, 8</code>	☐	☐
0.2	Supabase, then SQL Editor	Paste the whole of <code>rehearsal_demo_kitchen.sql</code> and press Run	A red error that starts "REHEARSAL DONE. NOTHING WAS SAVED. ALL CLEAR" with <code>findings=0, test_errors=0</code> . The red colour is normal: the error is the report	☐	☐
0.3	Cloudflare, then Workers and Pages, then nairaplate, then Deployments	Look at the newest deployment	It is green (succeeded) and came from the <code>main</code> branch	☐	☐
0.4	Supabase, then Database, then Backups	Look at the page	Backups, or Point in Time Recovery, are switched on	☐	☐

Part 1. Create the account for your first-time tester (3 minutes)

Do this once. It gives her a name and a PIN. This app has no emails or passwords: staff sign in with the **business code** and their own **PIN of 4 to 8 digits**.

#	Go to	Do	You should see	Pass	Fail
1.1	Open the app and sign in as yourself	Enter business code <code>demo-kitchen</code> , press Continue , tap your name, enter your PIN	The home screen with Sell, Buy & Stock, Kitchen and Oversight	☐	☐

#	Go to	Do	You should see	Pass	Fail
1.2	Home, then Oversight , then Staff	Look at the Add staff member form	Fields: Name, Role, Starting PIN (4 to 8 digits)	☐	☐
1.3	Same form	Type the name UAT Tester . For Role pick Cashier . Press Generate next to the PIN	A 6-digit PIN appears on screen: "PIN: 123456 — tell UAT Tester this PIN. It won't be shown again." Write it down now	☐	☐
1.4	Same form	Press Add staff member	A confirmation, and "UAT Tester" appears under Current staff as "Cashier · Active"	☐	☐

Write her sign-in details on the first-time-user script: business code **demo-kitchen**, name **UAT Tester**, and the PIN you wrote down. Do not send the PIN by any channel you would not use for a password. When testing is over, come back to **Staff**, find UAT Tester and press **Deactivate**.

Part 2. Selling (Cashier work, done as Owner) (10 minutes)

#	Go to	Do	You should see	Pass	Fail
2.1	Home, then Sell , then Cash drawer	If it says a shift is already open, stop and tell me. Otherwise type an Opening float (¥) of 2000 and press Open shift	The page now shows "Shift open since ..." with a ¥2,000 float	☐	☐
2.2	Home, then Sell , then Till	Leave Channel as Walk-in and Price tier as Standard. Under Item choose a dish, set Quantity 1, press Add (or Add item)	The dish appears in the order with its price	☐	☐
2.3	Same screen	Under Payment pick Cash , then press the Charge ¥... button	A confirmation that the sale was saved	☐	☐
2.4	Home, then Sell , then Orders	Find the sale you just made	It shows as Paid	☐	☐
2.5	Same order	Press Void / Refund . Choose Void , type a reason such as test sale , customer left (at least 5 letters), press the Void ¥... button	The order now shows as Voided	☐	☐
2.6	Same screen, Adjustments tab	Look at the list	A "Void" line with your reason, who did it and when	☐	☐
2.7	Till	Make a second cash sale. Then in Orders press Void / Refund on it, choose Part refund , type an amount smaller than the total and a reason, press the refund button	The order shows as Part refunded and the Adjustments tab shows a "Part refund" line	☐	☐
2.8	Till	Make a sale with Payment set to Customer credit (owe) . Type a customer name Test Customer and a phone number	A confirmation that it was put on credit	☐	☐

#	Go to	Do	You should see	Pass	Fail
2.9	Home, then Sell , then Customer credit	On the Still owing tab find Test Customer. Press Record payment , enter a smaller amount, choose Cash	The balance goes down by that amount	☐	☐

Part 3. Stock and money going out (15 minutes)

#	Go to	Do	You should see	Pass	Fail
3.1	Home, then Buy & Stock , then Ingredients	Find Garri and write down its stock (about 5.2 kg when this script was written). You will compare later. Units that Garri understands are derica (1.2 kg) and mudu (1.5 kg): the Units button on its row shows them	A list with each ingredient's stock	☐	☐
3.2	Home, then Kitchen , then Wastage	Under Ingredient choose Garri, Quantity 1 , Unit derica, Reason Spoilage, press Log wastage	A message "Logged 1 derica of Garri ... Stock has been reduced."	☐	☐
3.3	Ingredients , then Stock trail on that ingredient	Look at the newest line	A line for the wastage, reducing stock by 1.2 (one derica)	☐	☐
3.4	Home, then Buy & Stock , then Purchases	Fill in Ingredient Garri, Quantity 2 , Unit derica, Total paid (₦) 1700, Grade B and Season Normal (both required), Payment Cash. Press Submit purchase	The purchase appears under Recent purchases . Garri stock goes up by 2.4 kg (two dericas)	☐	☐
3.5	Same list	On that purchase press Reverse . Type a reason of 5 or more characters, press Reverse this purchase	The purchase is marked as reversed and the stock goes back down	☐	☐
3.6	Ingredients , then Edit on one ingredient	Change Price per kg (₦) to a slightly higher number, choose Grade this price is for B and Season it was bought in Normal, press Save	The new price shows on the list, and the History button for that ingredient shows the change	☐	☐
3.7	Home, then Buy & Stock , then Stock take	Under Count stock type a Counted figure that differs from the system figure for one ingredient. In "Why is it different? (required)" type a reason. Press Save count and correct stock	The count is saved and the stock is corrected. It appears under Recent counts	☐	☐

Part 4. The cash drawer (5 minutes)

#	Go to	Do	You should see	Pass	Fail
4.1	Home, then Sell , then Cash drawer	Under Cash counted in drawer (₦) type a figure close to float plus the cash sales you made (voided sales do not count) and press Close shift	"Shift closed", with the expected cash and how it was worked out (float, cash sales, and so on). A difference shows a note	☐	☐

#	Go to	Do	You should see	Pass	Fail
4.2	Same page, Closed shifts	Find the shift you just closed and press Correct the count . Type a new count and a reason of 5 or more characters, press Save adjustment	The original count stays on screen, with your adjustment beside it	☐	☐
4.3	Home, then Oversight , then Alerts	Look at the list	If the count was different from expected, an alert about the difference is there	☐	☐

Part 5. Batches and the three Reverse buttons (20 minutes)

Use test entries only. Every reversal is final.

#	Go to	Do	You should see	Pass	Fail
5.1	Home, then Kitchen , then Log a batch	Under Dish cooked choose a dish. If it says "This dish is set to Made to order", choose a different dish. Leave How many times the recipe at 1 , type Plates actually made 10 , press Save batch	A "Saved:" summary with cost per plate	☐	☐
5.2	Ingredients , then Stock trail on an ingredient used by that dish	Look at the newest line	"Used in a batch", reducing stock	☐	☐
5.3	Log a batch , then scroll to Recent batches	Find the batch you just made. Press Reverse . Read the note. Type a reason of 5 or more characters. Press Reverse this batch	The batch is marked "Reversed" with your reason. A green message says the ingredients are back in stock	☐	☐
5.4	Ingredients , then Stock trail (same ingredient)	Look at the newest lines	A line "Batch reversed, put back" which cancels the earlier "Used in a batch" line. Stock is back to what it was before the batch	☐	☐
5.5	Log a batch , Recent batches	Look at the older batches from before 3 October (there are six)	Each has a Reverse button. Pressing it with a reason gives the message "This batch was recorded before reversals existed, so it cannot be reversed." That message is correct and expected	☐	☐
5.6	Home, then Oversight , then Channel payouts	Pick Channel Walk-in , keep the dates, type Commission they took (¥) 0 and Amount that reached your bank (¥) equal to the sales shown above, press Save payout	"Payout saved." It appears under Past payouts	☐	☐

#	Go to	Do	You should see	Pass	Fail
5.7	Same page, Past payouts	On that payout press Reverse . Type fewer than 5 characters first: the Reverse this payout button stays greyed out. Then type a proper reason and press the button	The payout is faded, struck through and marked Reversed , with "Reversed by [your name] ... It no longer counts." A green message says to record the correct payout	☐	☐
5.8	Same page	Look at the reversed payout	There is no Reverse button on it any more	☐	☐
5.9	Home, then Buy & Stock , then Ingredients , then Edit on an ingredient used by a dish	Raise the price noticeably (for example by a third) and press Save	The new price is saved	☐	☐
5.10	Home, then Oversight , then Pricing review (this opens the Recipes page, scroll to Pricing review)	Find the dish whose price is now more than 2% away from the suggestion	The dish appears with "Now ₦..." and "Suggested ₦..." and three buttons: Publish , Adjust portion , Defer	☐	☐
5.11	Same section	Press Publish ₦...	A message "price changed ₦... → ₦...". The new price shows	☐	☐
5.12	Same page, Price decision history	Find that decision (newest, "Published new price"). Press Reverse . Read the note: it says the price goes back to the old figure. Type a reason and press Reverse this decision	A message "Decision reversed. The dish price is back to ₦...". The decision is marked "(Reversed)"	☐	☐
5.13	Recipes , then the dish	Check the selling price	It is the old price again	☐	☐
5.14	Pricing review , history	Find an older "Published new price" decision from earlier days and press Reverse with a reason	Either it works, or you see "Not reversed: the dish price has changed since this decision, so it cannot be put back safely." Both are correct. Write down which you got	☐	☐
5.15	Ingredients , Edit	Put the ingredient price back to what it was in step 3.6 and press Save	Saved	☐	☐

Part 6. The record of what happened (5 minutes)

#	Go to	Do	You should see	Pass	Fail
6.1	Home, then Oversight , then Audit log	Leave the dates on the last 7 days and look at the list	Lines for what you did today: order voided or refunded, cost changed, price published, and others	☐	☐
6.2	Same page	Look for lines about the payout, the price decision and the batch you reversed	Known issue: these three may show as plain code names (payout_reversed , price_decision_reversed , batch_reversed) instead of readable text. The lines should still be there with the reason in the description. Write down what you see	☐	☐

Part 7. Who can see what (10 minutes)

For each row, sign out first (the sign-out icon in the top bar of the home screen), then sign in again with **demo-kitchen** and pick the person from **Who's working?**. Use the existing Demo Kitchen staff, or the UAT Tester account.

#	Sign in as	Do	You should see	Pass	Fail
7.1	A Cook (Kitchen Staff)	Look at the home screen	Only the Kitchen group (Recipes, Log a batch, Wastage, Stock take). No Till, no Purchases	☐	☐
7.2	The same Cook	Open Log a batch , then scroll to Recent batches	The list shows, but there is no Reverse button	☐	☐
7.3	A Cashier (or UAT Tester)	Look at the home screen	Only the Sell group (Till, Cash drawer, Orders, Customer credit)	☐	☐
7.4	The same Cashier	Open Orders and look at an order made by someone else	Pressing Void / Refund and trying gives "Only an owner can adjust another cashier's order"	☐	☐
7.5	A Purchaser	Look at the home screen	Only Buy & Stock. In Purchases , recent purchases have no Reverse button	☐	☐

Part 8. Final tidy-up

#	Do	Pass	Fail
8.1	If you opened a shift and did not close it, close it now	☐	☐
8.2	When the first-time user has finished, go to Oversight , then Staff , find UAT Tester and press Deactivate	☐	☐

What to send me

For every Fail: the step number, what you did, what you saw, and the exact words of any message. Also send the outputs of steps 0.1 and 0.2. I will check the database side before changing anything.
